Product properties

esco PDV industrial salt is pure white, fully soluble and can be supplied in crystalline form and in various grain sizes, as well as in compacted form.

Despite its high quality, it should not be used in foodstuffs due to its high content of anti-caking agents.

Product quality

At esco, we take the quality and safety of our products very seriously. esco PDV industrial salt is extremely pure and has a sodium chloride content of 99.8%. This high level of purity is achieved through a careful crystallization process and the use of particularly pure and unadulterated brine.

We guarantee consistently high product quality through continual quality checks and seamless traceability.

Certification

esco production facilities hold valid certification to EN ISO 9001.

Service

We offer our customers first-class service, guaranteed consistently high product quality and a reliable international delivery.
